

## High class Mute integration brainwave twin electric locks

### Features:

1. card and remote control or reduce support EM or EM compatible card long distance, high-speed sensor, external dual card reader.Support 315MHZ learning remote.
2. The host can concoct an idea to achieve a lock assess control integration, and double encrypted wireless keyboard.
3. Compatible with all building intercom and access control systems lock signal.
- 4.With tamper alarm is set, it will alarm when the door is not closed.
- 5.Look automatically turned off, the alarm sounds and lisht, no collision, no noise, green.
6. Integrated stuctural design helps anti-destructive, in reasonable cirsuit and mechanical design, easy installation, easy oprate and its durability

### Technical Specifications:

|                     |                                      |
|---------------------|--------------------------------------|
| Place of origin     | Guangdong Province, China (mainland) |
| Brand name          | Proyu                                |
| Model               | PY-EL16                              |
| Working current     | 150 mA                               |
| Size                | 128x98x46mm                          |
| Weight              | 1.65 kg                              |
| Card Type           | EM card or compatible card           |
| User Support        | 1000                                 |
| Frequency           | 315MHZ                               |
| Input voltage       | DC12V + 20%                          |
| Quiescent Current   | & Lt; 80 □□                          |
| Working temperature | -40 ° C-70 °C                        |
