#### **Technical Parameters:**

Working voltage 6.0V (4 pieces of No.5 alkaline batteries)

Static current <15µA Card reading current ≤20µA

Lifespan of batteries 10 months or above

Indication of lacking voltage
Induction distance

Working temprature

✓20`C~70`C

Working humidity:

≤80%

## Lock and software working steps

Computer(to install the software), card encoder, cards,locks are the base one. Also, you could the Ene rgy saving switch, data collector to the system...as you can see the attach photo.

- The software will be supplied to you in FREE.

With the help of software, you will finish setting up the hotel lock easily..and in the reception of hotel , the hotel staff will make the room card for guest.

Then the guest get the room card and walk to the right room, swipe the card to the lock for unlocking, then insert the card to Energy saving switch to get the power if required.

- As a manager, you can get the daily/monthly/yearly report with the software.
- Also, the data collector will help you to get the preserve records from lock and read them on PC.
