

**Bimometric PY-x638**

Specifications:

|             |                                  |
|-------------|----------------------------------|
| Capacity    | 3000                             |
| Resolution  | 100,000                          |
| Model       | ZEM510                           |
| Interface   | RS232 / 485, TCP / IP            |
| Software    | Workcode SMS, DLST, Self-Service |
| Card Type   | Proximity Card, RIS ID           |
| Display     | 3 TFT                            |
| Power       | 5V DC 2A                         |
| Temperature | 0-45                             |
| Humidity    | 20% -80%                         |
| OEM         | Yes                              |
| SDK         | Yes                              |
| Material    | Aluminum                         |
| Weight      | 1.5kg                            |
| Dimensions  | 100x100x100                      |

Additional Information: This device is designed for high-precision measurements and is suitable for industrial and laboratory environments.
